

Glossary of Key Terms

- **5-Star Plus Lyric Maker:** A structured prompting strategy for generating song lyrics with ChatGPT, emphasizing specific details (Subject, Tone & Theme, Audience & Occasion, Rhythm & Style) plus a clear Format & Structure.
- **ChatGPT:** A specific type of generative AI, known as a large language model, that is particularly skilled at understanding and generating human-like text based on prompts. The name stands for Generative Pre-trained Transformer.
- **Cloud Storage:** Online services (like Google Drive or iCloud) that allow users to store files remotely on servers and access them from any internet-connected device, facilitating collaboration and backup.
- **Device Harmony:** The concept of seamlessly using and transitioning between multiple devices (like desktops, laptops, smartphones, and tablets) when working with AI tools, leveraging the strengths of each device.
- **Generative AI:** A type of artificial intelligence that can create new content, such as text, images, music, or code, based on the data it has been trained on.
- **Meta Tags:** Cues or labels (often in brackets, e.g., [Chorus]) used within lyrics or prompts for AI music generators like Suno to help structure and organize the different sections of a song.
- **Practice Demo:** A hands-on activity or demonstration within the course designed to allow beginners to immediately experience using an AI tool in a simple, low-pressure way
- **Prompt:** The input or instruction given to an AI model (like ChatGPT or Suno) to guide it in generating a response or creating content.
- **Suno:** An AI tool specifically designed to generate music, including vocals and instruments, from text prompts or lyrics.
- **Voice-to-Text:** A technology that automatically transcribes spoken language into written text in real time.
